

#### Our address

Runway East  
20 St Thomas St  
London SE1 9RG, UK

## WHO WE ARE

Applied Blockchain builds enterprise grade, future-proof blockchain applications and products for global companies and startups

### We solve problems

We build blockchain applications for our clients, with an even mix of enterprises and startups. We work with clients to advise on the best practice approach to maximise the utility of blockchain smart contract technology for a given use case, design the architecture of the system and then build the solution in accordance with both technical and business requirements.

### We build products

We pride ourselves on being at the cutting edge of our industry: By working on real world projects we see the technology gaps and understand how evolving technology can be applied. That's why we've been focusing on **cryptography** and **zero knowledge proofs** (ZKP). We think they will profoundly shape the future of our industry.

### We are developing and will soon release a new flagship product: K0 for supply chain and trading

K0 (pronounced "K zero") is our vision to enable digital assets, and digital twins of physical assets, to be created, verified and traded privately and seamlessly across multiple enterprise blockchain platforms & networks.

## Real World Blockchain Applications

We have received investment from Shell and Calibrate Partners and have built over 30 private blockchain applications, including some that are being deployed to production for some of the world's largest corporates.

### Our Clients include

## Solutions for

Privacy and Identity, E-wallets, Biometrics, Supply Chain, Energy, Financial Services, Aviation, Recruitment, Telecoms, Property, Legal, Automotive

## Notable recognition

Gartner has recognised Applied Blockchain as a global leader in blockchain consulting in 2017 and 2018.

**Gartner**

**Forbes** **Bloomberg**

**Microsoft** **VentureBeat**
